

# NRW CIVIL & MINING CAPABILITY STATEMENT

A large excavator silhouette is shown against a sunset sky. The excavator is in the foreground, with its arm and bucket raised. The sky is filled with soft, golden light from the setting sun, creating a dramatic backdrop. In the top left corner, there is a yellow square graphic. The overall scene conveys a sense of industry and achievement.

“**Our people** are the basis of  
**our success** and we invest  
heavily in their **growth**  
and **development.**”

# ABOUT NRW

NRW Civil & Mining is proud to be one of the leading contractors with over 25 years' experience in the Australian resources and infrastructure sectors.

The acquisition of BGC Contracting in 2019 has significantly enhanced the company's ability to participate as a large construction partner in public works projects and has added further scale and diversity in our mining business across the Australian resources sector.

NRW's positive safety culture has resulted in an industry leading safety record, and strong ties with local communities have been established through training programmes, employment, subcontracting and partnering opportunities.

## HEALTH & SAFETY

Keeping our people safe at all times is paramount to the foundations on which NRW is built. Our commitment to safety is reflected at every level of the organisation. We want all of our employees and sub-contractors to feel safe at work.

We strongly believe all accidents are preventable and join existing and prospective clients in a shared vision of incident and injury free projects.

NRW is committed to achieving the highest possible outcomes in occupational health and safety across all our business operations with a target to eliminate all safety incidents and injuries on every project. As part of our Vision & Values, NRW's *A Safe Day, Every Day* Program provides the umbrella for all safety initiatives within the Company. Since the program's implementation, NRW has established a positive safety culture and an industry leading safety record.

Safety at NRW is everyone's responsibility and all employees are actively encouraged to contribute to the occupational health and safety plan through the identification and mitigation of risks. Each employee receives extensive training in the safety procedures relative to their role and the correct operation of plant and equipment.

Our Occupational Health and Safety management systems are accredited to both AS/NZS 4801:2001 and the Government funded Federal Safety Commission. We manage risk through a planned and careful approach focused around hazard identification, minimisation, monitoring and control procedures and by reviewing safety performance.

Our management of safety is based on the principles and guidelines that promote continuous improvement.

*A Safe Day, Every Day*

## SUSTAINABILITY AT NRW

NRW is absolutely committed to the principles of sustainability. Our environmental management processes, coupled with our social responsibility objectives, drive our day-to-day decision making.

Our sustainability objectives are achieved by:

- Strict compliance with environmental obligations
- Minimising adverse environmental impacts through strong integrated management systems
- Efficiency improvements in our use of energy, water and resources
- Promoting innovative thinking and solutions
- Promotion of our employees' general health and well-being
- High level of engagement with stakeholders and local communities
- Only doing business with suppliers and subcontractors who uphold the same high levels of sustainability commitment.

# MINING

NRW Mining is one of Australia's leading mining contractors, with proven capability to safely deliver mining projects that meet timeframes and budgets. NRW Mining has become the contractor of choice for many of Australia's leading resource companies.

With a fully mobile workforce and an extensive list of plant and equipment, NRW Mining has demonstrated comprehensive experience in developing and operating mines in remote locations throughout Western Australia, South Australia and Northern Territory. Significant works have been undertaken in the iron ore, gold, diamond, and lithium sectors.

NRW Mining capabilities include:

- Mine planning and design
- Clearing and grubbing
- Topsoil removal and re-spread
- Drainage installation
- Drill and blasting services
- Pit development
- Load and haul
- Run-of-mine (ROM) and waste dump maintenance
- Crusher feed
- Crushing and screening
- Landscaping and rehabilitation
- Related ancillary works

# CIVIL

NRW Civil specialises in the delivery of private and public civil infrastructure projects, mine development and bulk earthworks. The strong growth of NRW's civil division has been built on a foundation of consistently delivering projects to the highest standards.

As a tier one civil contractor, NRW's extensive plant list provides cost and scheduling efficiencies on each project undertaken and ultimately savings for clients.

NRW Civil capabilities include:

- Bulk earthworks
- Road construction
- Bridges
- Concrete construction
- Rail formations
- Public infrastructure
- Tailings storage facilities
- Greenfield mine development
- Aerodromes
- Port development
- NPI
- Main Roads WA classification R5 / B4 and F150+

## BULK EARTHWORKS

NRW's growth has been built on the reliable execution of high quality, safely delivered bulk earthworks projects for blue chip clients in the resources and infrastructure sectors across Western Australia.

Works undertaken include earthworks for railways, run of mine (ROM) walls, stackers and reclaimers, stockyards, causeways, conveyors, car dumpers and related ancillary works.

## ROAD CONSTRUCTION

NRW has a long history in road construction, from haul and access roads on mine sites in remote Western Australia and Guinea, West Africa, to large scale government infrastructure alliance projects in metropolitan areas.

NRW's road building capability includes clearing existing vegetation, removal, haulage and stockpile of topsoil, foundation compaction, embankment construction, drainage installation, pavement construction, bituminous surfacing, signs and line marking, guardrails, topsoil re-spread, landscaping and rehabilitation, and traffic management.

## CONCRETE CONSTRUCTION

NRW has successfully managed and delivered concrete works since 2002.

NRW has established a dedicated team of specialised concrete project personnel including project managers, engineers and supervisors to specifically focus on concrete works packages.

NRW's concrete capability includes foundations and structures for plant and associated infrastructure including ball mills, primary and secondary crushers, load out vaults and conveyor trestle foundations.

## RAIL FORMATIONS

NRW has extensive experience in undertaking and successfully delivering major rail earthworks formations, duplications and sidings for major resource companies such as Samsung C&T, BHP, Fortescue Metals Group and Rio Tinto.

The scope of works on these projects typically includes rail formation earthworks, drainage, drill and blast, culvert installation and bridge construction.

NRW has undertaken rail formation works in the remote region of the Pilbara in Western Australia for over a decade.

Northlink WA Central Section, Main Roads WA

## PUBLIC INFRASTRUCTURE

NRW has an experienced team dedicated to the delivery of government infrastructure projects.

NRW's public infrastructure clients manage state and federal Government transport infrastructure (road and rail), utilities (water, wastewater, power, gas and telco) and defence assets (airstrips and wharfs).

The scope of works on these projects include road construction, rail formation, bulk earthworks, structural concrete, tunnelling and general civil engineering support for new assets or upgrades to existing ones.

NRW is prequalified by Main Roads WA to the highest level (R5 / B4 F150+).

## AERODROMES

NRW has been constructing and undertaking aerodrome upgrades and extensions in remote regions, since 2002. The scope of works has included sealed and unsealed runways, taxiways, aprons, carparks and associated ancillary works.

NRW's scope includes clearing and grubbing, foundations preparation, bulk earthworks, pavement construction, sealing, line marking, aerodrome navigation, system installation, lighting, signal markers and cones, windsocks, flag poles, footpaths, drains and security fencing.

## **TAILINGS STORAGE FACILITIES**

NRW's team has completed numerous tailings and water storage facilities including new dams and wall raises to existing facilities. These projects have been undertaken as stand-alone contracts as well as scope inclusions in larger projects.

## **PORT DEVELOPMENT**

NRW has experience in a variety of remote area marine based earthwork projects including breakwaters, offloading facilities and other port side earthworks.

NRW understands the importance of working in close proximity to the coastline and customises the delivery of work to ensure all environmental concerns are taken into account.

*Temporary Workers Village, Tom Price.*

## REHABILITATION

NRW has extensive experience in rehabilitation, operating in all conditions throughout Australia; both in stand-alone rehabilitation contracts and with works delivered as part of a large project.

NRW undertakes rehabilitation and mine closure as a full engineering, procurement and construction (EPC) service, early contract involvement (ECI), alliance, design and construct, or construct only depending on client requirements.

NRW is committed to reducing client's costs associated with the closure and rehabilitation of mines, executing mine closure plans safely and efficiently and achieving social and environmental outcomes that facilitate the relinquishment of their leases following closure.

## INDIGENOUS ENGAGEMENT

NRW appreciates that many of our civil and mining projects have an impact on the local communities and traditional owners of the land in which we operate. Our Company encourages Indigenous businesses, contractors and employees to be a part of our success through employment, training and business development opportunities.

NRW is committed to strengthening ongoing relationships with local Indigenous traditional owners. We will continue to recognise opportunities for Joint Venture partnerships or subcontracting opportunities to help support and develop sustainable Indigenous businesses in the civil and mining industry.

NRW will contract local Indigenous companies for the provision of services and plant wherever possible.
